

## Morris Knowles & Associates, Remote Operations for our Customers

Morris Knowles & Associates is open and ready to serve our clients. Governor Wolf announced the physical closure of all non-life sustaining businesses in PA. We respect this decision to ensure the health and safety of our employees, business associates and community as we all come together to prevent the spread of Covid-19

We have planned for this situation. Our staff is well equipped and working remotely without disruption of services to our clients. Morris Knowles has a secure and efficient technological infrastructure that provides our team with the ability to work from home.

Should you need to speak to one of our engineers, surveyors or project managers, you can call our main line **(724-468-4622)** during normal business hours and our receptionist will direct you to that person, or after hours, you may leave a message and your call will be returned. If you need to speak to a specific staff member, you may utilize the directory on our phone system.

Thank you for your business and we wish you continued health and safety.

William P. Utzman, PE  
President
